## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by hauser-5485828.

Hauser discloses an inhaler having a driver element 16, an acoustic lens 22 and a delivery system 24,26,28,32,36. The driver is powered by batteries.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-6 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hauser-'828.

Art Unit: 3761

Hauser discloses the invention as claimed with the exception of the type of lenses, number of lenses and drivers and the flow detecting circuit.

The applicant has disclosed on page 7 of the specification that plastic spherical lenses are easy to clean and can be used at lower frequencies. As such one skilled in the art would have found them to be obvious design choices. As it was well known prior to the applicant's invention that using a single lens or two lenses to focus with (merely changing their shape), to have used two lenses instead of one would have been obvious. To have provided a plurality of lenses and drivers would have been obvious as merely a duplication of known parts, especially in view of the fact that Hauser discloses that a plurality of reservoirs with different medications could be employed. As it is common to gate input of medication into inhalers with inhalation, to have provided a circuit to gate the powering of the transducer with enough airflow to indicate that the patient is indeed inhaling would have been an obvious modification.

The applicant is urged to disclose any information and/or prior art known concerning either high frequency droplet inhalers or typical capillary action droplet ejectors mentioned on pages 4 and 7 of the present specification.

***Allowable Subject Matter***

Claims 7-13 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
